

Data Analysis Intern

About this position

Asset Resolution's vision is of a financial sector that empowers the global economy to take decisive action to support the climate transition. Our mission is to optimize the accessibility and use of physical asset-level data for climate analysis by financial institutions.

We are looking for an enthusiastic **intern** to join our team. If you're someone who embraces a **startup mentality** and is excited to take on new challenges, we'd love to hear from you. We offer the opportunity to learn about and contribute to the world of ESG data, key sectors to the climate transition, and the growth phase of a startup.

Responsibilities

Your primary responsibility will be to **assist our team in their daily and delivery tasks**. Your tasks will depend on your experience and the team's priorities. For example, you will help:

- Deliver data and services to our clients
 - o Process our quarterly data refreshes (e.g., check asset ownership mapping, do some desk research for significant changes in the data between the different quarterly refreshes of the database such as sector trends, mergers, and acquisitions, changes at the level of the physical assets)
 - o Support answering client queries on our data
- Research companies in our database
 - o Research and harmonize company annual reports and regulatory data
 - o Document the drivers behind any differences between our data and corporate reported data
 - o Research and gather data on special corporate entities such as joint ventures and special purpose vehicles
- Expand our emissions modelling
 - o Gather data and compare against external benchmarks and methodologies (e.g., source and clean automotive test-cycle emission data for additional countries)
 - o Gather and clean data inputs
- Expand the sector coverage of our database
 - o Gather updated and expanded coverage statistics at company-, sector-, and global-level
 - o Develop an overview of various asset-level data providers (in particular new sectors)
 - o Explore options for data triangulation such as web scraping for specific data points
- Develop new products
 - o Research trends in the market
 - o Gather team members' and clients' feedback on market gaps and needs
 - o Develop product roadmaps for new products (e.g., biodiversity indicators)

Required skills and experience

- Passion for sustainable finance and data
- Experience in summarizing technical and dense information into concise texts for a general audience
- Gathering and cleaning data with code, ideally with SQL, R, or Python
- Microsoft Excel proficiency
- Fluency in English is required. Fluency in French is an advantage.
- Enthusiasm!

Location, remuneration, and duration

- Paid internship.
- 4-6 months. Potential transition to full-time after the internship.
- Remote, but right to work in France or Germany. Our offices are in Paris and Berlin. Any full-time position will be based in Paris or Berlin.

Application process

We are looking to fill the position as soon as possible. Please send your CV and a cover letter at jobs@asset-resolution.com. Phone interviews will be organized with shortlisted candidates.

About us

We were established in 2018 in Paris and work globally. We are expanding rapidly to support the growing needs of financial institutions. Our ever-growing database includes 300,000+ physical assets across the largest carbon emitting sectors and covers 85,000+ companies linked to 20,000+ financial securities. For each asset and company in the database we offer a suite of forward-looking climate-relevant indicators including location, production capacity, production, emissions intensity, and emissions. We offer access to this unparalleled database through bespoke data products, and we are developing analytical solutions to turn this data into information through, for example, scenario analysis and physical risk analysis.

We offer you

- A dynamic team of data scientists, analysts, sustainable finance specialists, and developers passionate about the climate transition.
- A young company that spun off from the [2° Investing Initiative](#), a leading international, non-profit think tank working to align financial markets and regulations with the Paris Agreement goals.
- A small organization that is rapidly growing, providing a lot of opportunities to get hands-on experience, make your voice heard and help shape our future.
- A mission that brings together technology and impact.
- Flexibility in terms of working hours and location.
